## NFC Chat

Hits: 55,139

**Description:** NFC is a scalable, distributed chat framework implemented in Java. The software is very flexible, allowing it to fill almost any chat requirement. Notable features include built in load balancing and HTTP-tunneling support. Using the load balancing, a distributed network of servers can be formed, similar to an IRC network.

### Resource Specifications

I think this is really cool. Great flexibility, so I could customize all the aspects of the environment that were relevant to my installation. Congratulations!
