**RSS import Feeding is missing**, Feb 14th, 2006

Reviewed By: truthonlytruth

If they add RSS import, this script would be excellent news publishing script...

**Great Script**, Mar 17th, 2006

Reviewed By: issam

A great script to work with, I made good money out of it :)

I am using it now for two site, its templating system is very easy to use, and it is really easy to build modules for it.

It lacks documentation but the guys are really helpfull and provide answers for everything

I do agree that an RSS import module is awsome if it exists, but i think one can build this within the script

One more thing is helpful is that if they have users forum

**Domain limitation**, May 26th, 2006

Reviewed By: justme2

I bought this script, in fact 5 licenses for \$600 something, but now that I want to change my domain names I found that they refuse that I change the lincense info to new domains.

To write-off \$600+ simply because they refuse to change the licenced domain names leaved a very bad taste.
