## Mail under pseudonym

Hits: 455

**Description:** www.mail-tech.com is a free spam protected mail service. Only a human, not a robot, is able to send you a mail and your e-mail address remain unknown for senders. They know only pseudonyms of e-mail addresses called mt-addresses. After you have chosen a mt-address, you can publish it, even on web, without a thought on spam. Mail is created through the site web form and directed to your ordinary e-mail address.

There is a possibility to add your ad, description into The Adaptive Directory and to search it by up to 12 keywords.

At any moment you can:

add new mt-addresses having one login and password;

change, delete mt-addresses;

change the ad, description for public;

hide or open the ad, description for public;

on/off search with keywords;

stop getting mail for a certain address;

allow or disallow getting mail without e-mail addresses.
