A Fantastic Program that couldn't be easier to implement!, May 11th, 200

Reviewed By: wolfdogg

If you're looking for a voting solution, you really couldn't find an easier one than this. It was 5 bucks and PayPal was accepted! That was worth the risk. After purchasing it, it took all of 15 minutes to set up. The instructions were clear and well written. It did state to use some FTP functions (chmod and all that), but I never even had to do that. I did everything through FrontPage. I now have multiple voting on the same pages. It stores all the results in its own directory on my site. It also records the user's IP in the files it creates, so multiple voting cannot occur by the same user. It seriously could not be easier and it works as well as you could hope. I wouldn't bother to leave a review if I wasn't very impressed! And one last thing... I wrote the author with one request for a change to the way it looked.. and I received the reply and solution in the next couple hours. Great job! Thx again!
