## FCKNuke Platinum V2fc

Hits: 1,250

**Description:** FCKNuke Platinum puts a WYSIWYG HTML editor into PHP-Nuke in many modules. Security is maintained by restricting what HTML the average user can add while still allowing the site admin to enter ANY HTML.

FCKNuke Platinum is built on FCKeditor. This editor will work in IE 5.5+, Firefox 1.0+, Mozilla 1.3+ and Netscape 7+. it will run on Windows, Linux, or MAC.

FCKNuke Platinum requires no changes to PHP-Nuke's Database. Minimal changes were made to files. This will help reduce the possibility of conflicts with other additions.

Finally FCKNuke Platinum is easily upgradeable as new versions are released.

### Resource Specifications
