# IP-Country mapping Database

Hits: 3,474

**Description:** Where are your Internet visitors coming from?

IP Address Country mapping Database can help you identify visitor's geographical location of an IP address. The IP Address to Country Code Database can be used for:

- 1>Real Time Geo-Locating ( Country )
- 2>Redirect based on country
- 3>Automatically target advertising by country
- 4>Geo targeting for increased sales and click-through
- 5>Provide Location Aware Content ( language, currency, etc.)
- 6>Fraud Detection ( Credit Card Fraud, etc. )
- 7>On-line Campaign ( targeted Banner Ads )
- 8>Web log statistics and analysis (Analyze your web logs )
- 9>Filter non-valuable traffic on basis of originating country and low your host bandwidth cost
- 10>Spam Filtering

## Resource Specifications
