iTreePad

Hits: 1,814

Description: If you've used the famous 'TreePad' then you know what this is about! Instantly place your TreePad 'hjt' files on your web server and access them from any browser... make edits, changes, all from the comfort of your Internet-connected computer.

I describe it as an Explorer for Notepad. Now you can share this data over the Internet now with an online explorer-style viewer.

Simply upload your TreePad file and visitors can browse your TreePad the way it was meant to be seen: as a tree.

This script allows you to open up whatever HJT files are located in the directory. If you have a family tree file, a journal, some notes all in the same directory then the script prompts you to open the HJT file of your choice.

Registered version comes with web online editing capability, searching, password protected nodes, multi-user editing passwords for specific nodes, and unlimited support and updates!

Some expected updates: auto folder opening, upload-from-browser capability and more!

Resource Specifications

Version:	2
Platform(s):	linux, windows, freebsd, osx, sun
Date Added:	Apr 21st, 2005
