# PerfGraph

Hits: 2,160

**Description:** PerfGraph is a software package that continuously, 24 hours a day, 7 days a week, measures the performance of your Unix systems. The data is stored in a database; the gathered data can be displayed graphically by just pointing your favorite web browser to the web-server connected to the database. The PerfGraph Server needs a run-time environment consisting of Perl, Postgres and Apache.

Resource Specifications	
<b>Version:</b>	2.2c
<b>Platform(s):</b>	Unix
<b>Price:</b>	Free Trial/\$1,295
<b>Date Added:</b>	Mar 28th, 2000
<b>Last Updated:</b>	Mar 28th, 2000
