# Barracuda Directory Script

Hits: 4,714

**Description:** Barracuda directory script is a links directory software that created thematic and niche type links directory with seo structure and direct links. It is easy to install, comes with 4 premade design templates, google pagerank feature and customized email templates. You can create a thematic directory of sites and exchange links with other sites in your niche. Now you do not need to create links pages or use search engine not-friendly scripts. Barracuda directory script also comes with cross-linking and same theme redirecting options. Directory script calculates top links and displays new links, all features are configured via directory script admin panel.
