# XML/SWF Gauge

Hits: 1,745

**Description:** XML/SWF Gauge is a simple, yet powerful tool to create attractive web gauges and dials from dynamic data.

Create an XML source to describe a gauge, then pass it to this tool's flash file to generate the gauge. Type the XML source manually, or use any scripting language to generate it automatically.

XML/SWF Gauge makes the best of both the XML and SWF worlds. XML provides flexible data generation, and Flash provides the best graphic quality.

Features:

=====

- Web gauges and dials from dynamic data
- Simple and flexible drawing tools to create unlimited gauge types and pointers
- Live updates without reloading the web page
- Clickable and interactive links
- MP3 sounds
- Quality Flash graphics

## Resource Specifications

<b>Version:</b>	1.0
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	May 12th, 2005
<b>Last Updated:</b>	May 12th, 2005
<b>Author:</b>	maani.us
