ecCard ASP eCard system library

Hits: 2,445

Description: ecCard is a 100% ASP/VBScript class library designed to allow you to integrate a simple on-line email card (eCard) system using images on your web site. Designed to be easily integrated into existing ASP based web sites by a web site developer with basic ASP/Html programming skills. Developer license allows use on unlimited number of sites. Reads image files directly from your web site folder (display in single or multiple column format). Built in standard formats for input forms and eCard. Ability to create custom input form templates (input fields are fixed). Ability to create custom eCard output templates. Dynamically generates and sends eCard email. Supports CDOSYS or ASPEMAIL email components. Fully commented test application included.
