Automatic Text To Link

Hits: 1,236

Description: This script allows a website to set certain keywords to automatically turn into links the first time their mentioned in articles. This is a useful script for alot of buisness and sports sites. Most sites will use this when a reference is made to another website or when referencing a player on a sports site.

This script can also be configured to link keywords whenever they are mentioned, or to only link them on the first occurence.
