# Bed & Breakfast Reservation and CMS Complete

Hits: 2,799

**Description:** Got a Bed & Breakfast? Want to be able to take reservations over the internet? Then this script is for you. It is a complete CMS system with PHP scripts built in to allow you to take reservations over the web. Paypal integration is built in with the reservation system. CMS side is easy to add as many pages as you want to your site.

\*\*\*

Now with a new Javascript date picker control and date validation routine to prevent dates from being entered incorrectly.

## Resource Specifications
