Not bad but could be better, May 24th, 2005

I have used the for my website for the last few months and it's not bad, it has really good features; but the down side to it is if someone abuses there features the website gets shut down. This website doesn't warn you or give you any way to contact them, if it does go down. But for over all I would have to say it's pretty fair.
