# PM Report

Hits: 6,435

**Description:** PM Report is a PHP/MySQL report generator. It creates customizable reports and is very simple to setup and use. You can select which database, table, and individual fields to use on your report. You can also select the order in which the fields should appear on the report, the field you would like to group by, the field you would like to sort by, and whether or not you would like a total for each column. Once the report has been generated, you can highlight individual rows and export the results to CSV. You can also enter your own custom SQL query manually. As of version 3.0 you can generate PDFs. Version 4.0 allows you to save, modify, and/or delete reports.

## Resource Specifications

<b>Version:</b>	4.2
<b>Platform(s):</b>	linux, windows, freebsd, osx, sun
<b>Date Added:</b>	May 19th, 2005
<b>Last Updated:</b>	Apr 7th, 2008
<b>Author:</b>	Zeke Walker

**Average Visitor Rating:**  **3.22** (out of 5)

Number of Ratings: 9 Votes

**Average Member Rating:**  **0.00** (out of 5)

Number of Reviews: 0 Reviews
