Protect your family on the Internet Make sure they are being safe on the Internet with lamBigBrother Internet Safety Monitoring Software. Big Brother will hide on your computer and secretly record all instant messages, chat, email, web sites and more! Once you install it, it becomes completely invisible. Then, after the computer is used, you just enter a secret key-sequence, and you can see everything that happened! With lamBigBrother you can record: AOL Instant Messenger MSN Messenger All web sites visited All keystrokes typed Web based email Compuserve AOL mail, version 5, 6 and 7. Big Brother will NOT show up anywhere in the START menu, there will be no icons for it, and it won't even show up in the CTRL-ALT-DELETE menu. Only you can access it with a special key sequence/password.

## Reviews for iambigbrother monitoring software

**very dissapointed**, Jan 29th, 2008

Went to iambigbrother.com and purchased software. Get no response from customer service AT ALL. Stupid me, could not get a download link from them (had problems with computer)and purchased again (yes, I know what your thinking). Still once again, emails go totally unresponded to. I cannot see the screen shots and need help to determine why. A good product with absolutely NO CUSTOMER SUPPORT from iambigbrother.com At one time I would have highly recommended this product to my friends but no more
