# webJobs Resume Wizard Plugin

Hits: 3,940

**Description:** The webJobs Resume Wizard Plugin allows job seekers to easily create and publish their resumes online. The plugin comes with four predefined templates that seekers can choose from. After a template is chosen, seekers will be walked through the process of creating the resume step-by-step from the Objective to the Experience sections of the resume. The plugin allows seekers to post their resumes online and give out a unique and printer-friendly URL for employers to view their resume.

This is another great addition to our already powerful and feature-packed job board software package.

## Resource Specifications
