Website Counter with Referrer, Language and Country Tracking

Hits: 1,477

Description: This Script tracks the visitors, referrer, browser, Operating System, Flash version, screen resolution, language and country of the visitor. So it is possible to determine the effectiveness of your advertising efforts or your entries in the search engines. Easy installation (2 min), no MYSQL database needed, no HTML or PHP skills needed, free email support, no attendance with same IP numbers count doubly (if the surfer clicks on the refresh button for example, only unique visitors).

Resource Specifications
