# CosmicDirectories

Hits: 967

**Description:** CosmicDirectories v3.5 is a powerful software package which allows you to create your own fully customizable, searchable website directory. Categorize and sub categorize, add, review and remove sites easily. The Tradeonly option allows you to list only sites that have linked back to you, you don't have to check for a link back, the script does that before the site is submitted! Bring in moderators to help you manage your directory assigning them specific categories to work in.

## Resource Specifications
