visitor.source.tracker ASP.NET

Hits: 1,618

Description: Fully customizable ASP.NET script. Find out what are your website visitors from - which domain, IP, country. Use this tool to prevent credit card frauders, limit bandwidth usage and costs, filter visitors geographically, eliminate fake registrations, redirect visitors, filter access, filter content and much more. No SQL database is needed! Every important information is stored inside one DLL. Extremely fast - results in less than one second. Free demo.
