Simple Upload

Hits: 11,475

Description: This script lets you upload a file to your server using only your web browser. You only need to set 2 variables and create the upload directory on your server. This script will limit the types of files that you can upload to images, zip files and pdf documents. It will automatically create sub-directories if required. Additionally, you can do a directory listing of your upload directory. A password is required to upload or list files.

Resource Specifications

Version:	0.4
