# HTML Encryption with Ultra Secure Plugin Protection

Hits: 3,622

**Description:** With HTML Block HTML Encryption you can encrypt as many webpage(s) as you like using a new plugin which adds secure Javascript to your site so that no-one can edit, save copy or do anything with with the content on your website. It protects your layout, images, graphics, text and more.

After testing the demo page to see just how effective this program is at protecting your web page source and accessing the decrypted source of the demo page in one mouse click I am able to state that this program is as big a waste of money as any of the other similar programs that I have seen. Want to pay to drive legitimate visitors away so that only the thieves stealing your source will visit then this might be just the option you are looking for.
