FingerTips

Hits: 7,801

Description: FingerTips is an ASP software application that empowers webmaster and web designers alike, to offer their users the ability to build their own web sites. Much like Geocities. This is an intuitive, robust, and feature packed software solution that allows you to take your web site that one step further. Packaged with a WYSIWYG HTML editor now your users can make quality web sites without needing to know any HTML. Version 2003 now supports MS SQL and Pay Pal.
