Red Queen: Next Generation Link Manager

Hits: 2,218

Description: Now with zipcode-based searching and image galleries! Large sites rely on user reviews to provide efficient wealth discovery of the content of their pages. Red Queen features the most advanced review system available in a Link Manager. With custom ratings per category, custom SQL fields, file uploads, auto-thumbnailing, templates, forum membership integration, top reviewers, a powerful search engine, link validation, and static page builds among its features, you're set to compete with the big sites. You can even set up Groups for Members to join, Yellow Pages for Suppliers, and everything is reviewable, even the members themselves!

Resource Specifications
