PPC Search Engine

Hits: 3,545

Description: PPC search Engine features an advanced PPC engine designed to generate more revenue for you, while at the same time maintaining a fair trading environment for your users and customers.

PPC Search Engine System is powerful, fast and secure. You will never have to wait for a page to load. Refreshing the database, search results or admin area takes seconds, not minutes or hours.

No client side software required. You will be able to monitor and administer your search results from your website in a password protected administration area. Powerful affiliate program allows you to integrate your affiliates website designs into the search results they will display. This will make your affiliates more receptive and happier.
