SWF Live Preview

Hits: 2,466

Description: This software is aimed to help you preview Flash movie files using standard Windows Explorer. Once SWF Live Preview is installed you can scan directories and subdirectories for flash files, create and preview thumbnails for SWF files and fetch information such as Flash version, number of frames, shapes, find if file is compressed or not, etc. You can even choose yourself from which frame to create thumbnail as well as set size of preview.

What a life saver for someone who has hundreds of swf files and a lousy memory. Simple to use but an incredibly useful aid, allowing you to view thumbnails of your files so you can see a mini preview of the content. It doesn't work on FLA's but, hey, what d'ya want for free?
