Email AnyPage

Hits: 652

Description: MASTER RESELL RIGHTS FOR THIS SCRIPT AND OVER 100 MORE INCLUDED IN THE PRICE!!!

CGI Script allows surfers to email webpages to their friends from your site. Smart CGI works so you do not have to create special unique forms for every page of your website. One form will work from any URL. Email arrives as exact copy of your webpage in HTML format.

You can insert custom headers and footers such as banner ads, text ads, affiliate code, etc. Script also records IP of sender to block malicious users. Subject line automatically generates full URL of webpage.

Works great with Automark to get people to bookmark your site or our Mailjacker script which will force email recipients browser to open up your website.

Resource Specifications
