Silentum Counter

Hits: 3,915

Description: Silentum Counter is one of the easiest and weightless PHP counters you can find. It uses only two text files to store the totals, so no MySQL is required. Both the amount of total visits and the amount of total uniques, using cookies, are recorded. The counter can also be styled however you like, and integrated with ease into absolutely any page. Great if you want a simple counter without all the clutter.

Resource Specifications

Version:	1.5.0
Platform(s):	linux, windows, freebsd, osx, sun
