Sales-n-Stats: live help software & website statistics tool

Hits: 6,124

Description: Sales-n-Stats is a live help software and a website statistics analysis tool combined into one Java/PHP solution that adds such features to your site as visitor tracking (IP addresses, referrer domains, search keywords, personal profiles and history of visits and actions), real-time visitor monitoring (the current website zone and page, site paths, visitor badges allowing you to recognize returning and VIP customers), live help button, voice chat with customers via Skype, customizable website reports (including reports on site usage and ad campaigns), out-of-the-box integration with X-Cart and LiteCommerce shopping cart software, free integration modules for phpNuke, Mambo and OSCommerce. Talk to your customers, help them instantly, find out their actual needs and analyze their behavior. Improve conversion rates with live help functionality and understand your business processes better with comprehensive website statistics and marketing reports. Free version and trial are available.

Sales and stats, Apr 20th, 2006

Reviewed By: shishapipe

I have found, that since using sales and stats my sales have increased, yes thats right, i think its the live chat, as when people order and not sure they then use the live chat. Also a lot of valuable info can be obtained, especially for me the search engine stats, i know what keywords people are using to access my site and i know who is pointing to my site. I found out that even the daily telegraph mentioned my site through sales and stats monitoring, this is a must have addon for any site.
