Article and News Management PowerScript

Hits: 5,696

Description: Article and News Management Power Script is a ready to install article and News search engine and directory which has features like user management, article/news management, automatic generation of rss feeds, automatic generation of sitemap and easy to use backend admin. You just install it on your server and you can start allowing users to submit articles to your site. Users can add as many articles/news as they want and they can easily add/modify/delete their articles. The RSS contents get automatically updated as the contents of the site are updated. You, the admin, gets a separate area where you can monitor all the activities of the site. You can add/modify/delete users, articles and categories. This easy to use powerful script is a very good way to get free relevant content on your site from users across the world.
