SUPER WHOIS

Hits: 723

Description: MASTER RESELL RIGHTS FOR THIS SCRIPT AND OVER 100 MORE INCLUDED IN THE PRICE!!!

TELNET OR CGI WHOIS CLIENT

CGI Script works with the new-mangled whois system introduced 1 Dec 1999. A web based whois client for RFC-954 compliant whois servers using the shared domain registration system as revised 1 December 1999. Under the new domain-name regime the whois system is now distributed amongst the various domain-police^H^H^H^H^H^H ^H^H^H^H^H registrars, thereby requiring that we make at least two separate requests (to two separate servers) for each whois record. This program will first go to the "root" whois server and ask for a record. If found, the root server will tell us where to go get the actual record, and then we go get it. You can replace the whois program on your server and run by telnet or run as a cgi script.
