**phpArcadeScript is Excellent!**, Dec 19th, 2005

Reviewed By: skyraider7

I use phpArcadeScript for FastArcade. It's a great product. I especially like the integrated user system, which enables administrators to send out newsletters announcing new game additions. It's very easy to reconfigure your site in a matter of minutes using the control panel. Highly recommended.

**Great script, great support!**, Jun 8th, 2006

Reviewed By: karend

There are lots of great features - several file types supported, member system with points for players if you want to use it, built-in link exchange, banner ad manager. Very easy to customize and the price is very reasonable.

Also the support is terrific. They go out of their way to make sure you're satisfied and understand how to get the maximum benefits out of the script.

**This script is NOT hot!**, Jul 13th, 2006

Reviewed By: admire

I purchased a copy of this arcade-script because I wanted the users to be able to log in and I loved the fact that user could send messages to each other.

But... When I got it and had a look at the PHP-code I was disapointed, the programing is sloppy as h..., and I wanted to translate it to Norwegian, and that was not so easy.

This is easy to say: This script is NOT worth \$30

The programmers have done a real bad job with this.

**Very happy with purchase**, Oct 7th, 2006

Reviewed By: Detrol

Ive only used it for about a week right now and im very pleased how it works. And as someone said about translating i translated to swedish just fine, and made my own template and interigated it easier then i thought, very good!

**Great package!**, Nov 14th, 2006

Reviewed By: cashduck

The package itself is only \$30 and they installed it and uploaded everything for \$20. The administration is very easy even if you are not a programmer and the support forums are great. All you need is a domain and hosting, they will set up the rest.

**Fantastic Script**, Feb 4th, 2007

Reviewed By: cgi man

I bought this script for my site a while back and I am very pleased with how easy it is to use, all the great features, and the support is great. I go to the support forums all the time to look for mods and addons. It is really easy to change the template and I know almost nothing about PHP. I highly recomend this script.
