DODOSMAIL on first glance, Jan 20th, 2007

Reviewed By: Jeniveve

I have looked at a lot of script instructions and this is one of the easiest installation instructions I have come across for a free script. The developer really tells you what each part of the script does and why you should or should not use it. I have downloaded the script and am going to attempt to get it working. Since I am a newbie to php, I plan on returning and letting everyone know how it went! But for now, the documentation is really great and very easy to understand!

Updated to 2.5, Oct 9th, 2008

This script was updated to 2.5 in Feb. 2008 (which is indicated on her site, however, she even forgot to update this in her script). She added header injection protection, so use the latest version.
