Pixelate Pro

Hits: 2,364

Description: Pixelate Pro v1 is a professional actionscript component that can be used along with your flash movies in order to perform high optimized pixel tweening. The Pixelate Pro component is special designed for Flash MX 2004 and needs to be included in FlashPlayer 7 movies. This effect has never been done before, not dynamic, in order to perform such an effect you would probably need a lot of images, a lot of kbytes and a lot of time. Using this component you're gonna save time, file size and, of course, money.
