# Asbru Web Content Management - ASP Hits: 3,188

**Description:** Out-of-the-box, full-featured, database-driven web content management system with community, e-commerce, database and statistics add-on modules for creating, publishing and managing websites with advanced, dynamic end-user and website administrator functionality. Includes advanced WYSIWYG editing, workflow, staging, scheduling, automatically generated content lists, multilingual content, advanced scripting, personal workspace and access permissions for website administrators as well as for visitors. Easy creation of as many templates/style sheets as required. Example usage: Create a multi-lingual website and Extranet and Intranet websites with product catalogue, shopping cart, user registration, message boards, discussion forums, weblogs and email newsletters. Manage the website with multiple website administrators with differentiated access restrictions and publishing workflow processes. Includes open program source code for unlimited customisation and integration with other systems.
