# EZPoll

Hits: 8,761

**Description:** This is a simple poll script in which you can add and delete polls or review past polls. The admin section is password protected. You add the poll to your ASP page with one line of code. Download the zip file and open it on your hard drive then read the readme.txt file for instructions. Uses a MS Access 2000 database.

**nice simple polls**, Sep 29th, 2006

Reviewed By: davidazus

This is a nice simple script, very easy to create quick polls.

I did find the question fields a little small for my taste (max 50 characters), but it was easy enough to modify the database to allow longer fields. Also, a way to edit current polls (ie, fix typos!) would be nice.

Configuration is one line (putting the path to the database), and one line of code to embed it into an asp page, makes it about almost as easy as can be to integrate.
