# The interactive Graphic Novel

Hits: 7,486

**Description:** Powered by PHP and JavaScript. Back boned by MySQL. This script, although still in development, is designed to allow users to create interactive visual stories for the MS-IE browser.

The script itself will allow users to upload images and to create and view story nodes.

This version of the script has been tested on linux and windows for the server side of the scripting.

Missing functionality is currently being worked upon. The only thing that is currently missing is the ability to link story nodes from within.

Note- This is still in it's early stages. Feed back is apreciated. This version is only for developers. DL and view at your own frustation.

## Resource Specifications
