# AUTO THUMBNAIL & GALLERY MAKER Hits: 1,502

**Description:** Automatic Thumbnail Maker and Photo Organizer

CGI Script which you simply drop inside your website and execute and it spiders your entire directory structure, creates thumbnail images and organizes all your photographic content into easily browsable html with thumbnail tables that link to the actual image. Creates true uniform, beautiful thumbnail images - this is not just some cheap html trick. Great way to surf and organize complex image archives and to organize content automatically. You can control the size of the thumbnail images and the look of the html output very easily. Spiders even the most complicated directory structures and wont make mistakes like other programs! Save endless hours creating thumbnail galleries and organizing content by using this program to archive thousands of images in seconds. Thumbnails are organized into a seperate, parallel directory structure and not littered everywhere. Logs all activity and creates files you can use for other applications or simply search through to find that jpeg you lost 6 months ago.

## Resource Specifications

<b>Version:</b>	3
<b>Platform(s):</b>	linux
<b>Date Added:</b>	Jul 27th, 2005
<b>Last Updated:</b>	Jul 28th, 2005
<b>Author:</b>	Don Richards
