## RSStatic console™ - dynamically driven RSS reader Hits: 2,667

**Description:** RSStatic has evolved with the release of RSStatic console™, the new dynamically driven RSS reader capable of turning ordinary sites into ever expanding SEO friendly sites. This new release gives you even more control over how and what is displayed on your site. Never again will you have to worry about updating your site as it will now grow on its own.

Unlimited amount of added content to your site:  
Everytime a feed updates, your site will have new content added.

Maintenance free:  
Simply set it up and it will continue to expand your site.

Search Engine Friendly URLs:  
By using the title name of each article in the URL, you instantly create keyword rich links.

Built Using PHP:  
PHP is supported by most host and is available as a free download for those who don't currently have it installed.

Driven by MySQL:  
Each page is stored in the world's most popular and secure database, insuring easy installation, security and minimizing used space on your server.
