Small Url Server

Hits: 3,024

Description: Start your very own Small Url Service today with this very easy to use script. It uses a MySQL database for fast loading, and you have full control over the layout of the script, although a little html know how is needed, but since you are a webmaster that should not be a problem :-). The user does not have to sign up. He / she simply enters the url, and submits the url. Then a new small url will be created and is ready to use. In the administrator panel you have a simple overview over the top urls. You can enter any number to see the stats. For example, you want to see the top 50, simply enter 50 and submit. Then the top 50 will be loaded! You can delete old url`s. For example, urls older then 100 days can be deleted with a simple click on the button. This can be any number you choose.

Some key Features:

- Super fast loading
- Takes very little server resources
- Toplist url overview
- Self promoting service
- Full layout control • Delete old url`s
- Low priced
