# MyNotes, a MFC MySQL++ client example source codes

Hits: 4,106

**Description:** Would you like to know how to create MySQL client applications using Visual C++ with MySQL++ class library?

What is MySQL? The MySQL database server is the world's most popular open source database. Its MySQL++ C++ class library allows you to easily create clients that accesses the database, either on a local computer, LAN or the Internet.

If you are looking for a full example source code for a complete MFC C++ program that uses the MySQL++ class library to access a MySQL database, then this package is for you.
