Simple PHP Link Manager

Hits: 3,372

Description: "Simple PHP Link Manager" is an easy-to-install and configure link management system that facilitates categorized links and flexible display. It also counts the number of times a link has been accessed. It runs on PHP/ MySQL and comes complete with the HTML form and script to insert new entries, and the script to display it. It comes documented with a very easy to understand "Read Me" file and well commented scripts.
