Group Schedule

Hits: 995

Description: Do you have a group of people you need to organize meetings with? Well this CGI will calculate when the best times are for your entire group to get together. This is done by every member submitting the hours of each day of the week they are generally available at, then the CGI prints out a schedule that tells you at exactly what times everyone is available at. I thought of this because game clans have trouble finding times when everyone is available to play, but it can be used for anyone, such as a business needing to know when to schedule team meetings!
