kN2Tag

Hits: 4,670

Description: kN2Tag is a functional tagboard with an experimental tag system dealing in a new way of getting in touch with posters. QuickMail is a revolutionary way of replying to a tag in which online users may send text based emails to posters using the tag-board system.

kN2Tag also has many built in features such as:

- * Smilies
- * Admin Controls
- * QuickMail
- * Flood Control
- * Spam Control
- * Swear filtration
- * Anti-Cheat Functions
- * IP Logging
- * IP Banning

Knoxious.co.uk's copy is only semi-functional, download the fully-funtional copy and give it a go... It's easy to install! Also If you like it, please donate not rip.
