Ryneezy PhoSheezy

Hits: 3,711

Description: Ryneezy PhoSheezy is a web based photo management system. It features a powerful yet easy to use administration program for effortless picture uploads, thumbnail creation, management, and more.

PhoSheezy makes it easy for websites with large photo collections, such as a swim suit model website, to organize and add more digital pictures. Even websites with small photo sections will benefit from PhoSheezy's simple album management features.

Features: Friendly web based administration program, Automatic thumbnail creation, Digital pictures organized through albums, Captions for each photo, Dynamically creates album web pages, Customizable layout, Database driven application
