Great software, Jul 4th, 2006

Reviewed By: Muppler

This software is really nice.

It works perfectly with PHP 5 and MySql 5!

Lots of functions and comfortable to administrate!

my opinion on this board, Oct 25th, 2006

Reviewed By: sailor444

well im using it since nearly 5 month and with the latest version its really stable (didnt have one problem so far) and really fast!

you will have all the features you need to maintain a small or big community.. newsletter, spam protection, a really giant admin control center, private messaging and a wysiwyg editor

what i didnt like was creating a skin... as the skins are based on css it was not really easy for me as a webdesign noobie to get it going, but in the end it really looked great...
