Hits: 930

Description: *Built-In Duplicate Email Address Filter

You can rest assured that there will be no duplicate email addresses amongst your affiliates, as the built-in filter will make sure it doesn't happen for you

*Built-In Email Address Verification System

Every new affiliate must verify his email account before being able to access your affiliate program. This is to ensure the validity of the information of their accounts

*24/7 Access to Their Live Earnings Information

Your affiliates will have complete and full access to their earnings information; which is displayed to them on a Live basis every single time for your affiliates benefit

*Dynamically Generated Affiliate Code

Your affiliates will be given access to the Links and Banners area from where they can get their personal affiliate link, and/or choose from the available banners on your banners database

*Complete Control of Their Affiliate Profile

They will also get full control of their affiliate profile information thru the Edit Profile section that will be made available to them. They will also be able to opt-out of the affiliate program voluntarily thru this section

*Easy to Use Web Based Affiliates Section

Your affiliates will be able to access the features mentioned above thru the built-in easy to use affiliates only section. It is password protected, as normal; with the option of saving the affiliate id on a cookie for their convenience.

*Self-Serve Lost Password Recovery

At any time your affiliates wish they can request their login information to be resent to their contact email address on file only, for security, easily from the same page they will login

Admin Area Features

*Extremely Fast Affiliates Search

Find any one, multiple or even list all affiliate accounts at once, thru the Members Search part of your administrative section. From where you can edit member accounts, verify unverified email addresses and/or delete any of the accounts

***Built-In Members Contact Email Mailer**

Send your contact email messages to all active affiliates thru the built-in and easy to use email mailer. You can send in either text or html too

***Built-In Pre-Defined Pages Editor**

You will edit any of the pre-defined pages that will be used to generate the pages displayed in your site thru our built-in web page editor

***Built-In Pre-Defined Emails Editor**

Complete control of all the pre-defined email messages that will be sent by the package thru our easy to use built-in message editor

***Complete Control on All Settings**

Change any and/or all the settings of your affiliate program and site thru our built-in Settings Editor. Add, edit and/or remove products from your products database. And you can also add, edit, or remove banners to be used by affiliates from your banners database as well. For the banners database all you have to do is have the banner image ready and the full URL to the banner image., the code is dynamically generated by the package for each affiliate

***110% Flexible Commissions/Thank You URL's System**

The commissions and thank you url's are kept in the database specific and separate for each product. So you have complete control over your affiliate program!!!
