WEBK filesystem oriented content delivery

Hits: 2,494

Description: WEBK is a software that uses an alternative way to build websites. Conventional websites need to be created from scratch, often requiring specific HTML design / CGI programming knowledge, with WEBK you can create a full website without having to waste much time on the construction process. Since it costs nothing, feel free to try it.

NO DATABASE REQUIRED

Resource Specifications

Version:	1.0 beta
