SnippetEdit Website Editor

Hits: 2,315

Description: SnippetEdit is a PHP-based program that makes it extremely easy for non-technical people to edit their own web content. Install on any website, subdomain, or sub-folder website in about 1 minute. Built-in password protection or integrate with your own authentication. Users can edit page source or even database content.

SnippetEdit "Rocks", Sep 8th, 2005

Reviewed By: gregschipper

I am a commercial web designer, and hate making html websites dynamic, with the usual long setup time. Then I tried SnippetEdit. Setup time was just minutes. Then I set permissions for the files, then added the simple marking code, and wow... it worked on every page. My clients now are pleased with much lower time invested to change a website to dynamic edit. Thanks Troy and SnippetEdit for a "Great Product".
