BP Blog from Beta Particle, Oct 22nd, 2005

Reviewed By: martyd

The author seems to have a good start on an ASP Blog script. Its workability, however, is a bit problematic. I can accept that but access to the author is virtually non-existent. I would like to use the product with the hope the author might continue development and maybe even offer suggestions for support. He seldom if ever responds to email inquiries. I don't think it will be my long term solution to Blog or Blog Server Software
